

## CLINICAL DATA MANAGER

### WORK OPPORTUNITY FOR STUDENTS AND GRADUATES OF Faculty of Biomedical Engineering (FBMI)

Based on our long term experience with the internships of FBMI students in our company, we'd like to share with you this unique job opportunity opening a door to a career in a clinical research, an industry of the future.

NEOX s.r.o., a part of Emmes, a global full service clinical research organization (CRO) dedicated to supporting the advancement of public health and biopharmaceutical innovation is seeking **CLINICAL DATA MANAGER**.

The key responsibilities for the Clinical Data Manager are to:

- Manage all aspects of the global clinical study data management process from start-up to database lock and regulatory submission support.
- Manage the selection process for a Global Electronic Data Capture (EDC) system for clinical studies.
- Plan, design, validate, verify and implement database or EDC systems to support clinical studies globally from a data management perspective
- Review and contribute to clinical protocols/amendments, clinical study reports, statistical analysis plans, etc.
- Review and advise on CRF completion guidelines, prepare external data transfer specifications and other study documentation related to data management.

#### Minimum Education & Experience

- Bachelor's Degree, or educational equivalent, in biomedical engineering or related field, preferably (but not necessarily) with direct Data Management experience.
- Fluent in English, both written and verbal.

You will receive a competitive salary and annual bonus as well as;

- 25 days holiday
- Friendly, collaborative and international working environment

#### Employment Type

- Preferably Full-time
