

Job Offer

LC-MS operator in Proteomics service laboratory

You will:

- Operate mass spectrometer Orbitrap Exploris 480 coupled with UHPLC UltiMate 3000
- Maintain and troubleshoot the mass spectrometer, UHPLC and accessories
- Design and optimize LC-MS acquisition methods (untargeted and targeted)
- Monitor system performance by running quality control samples
- Analyze and visualize generated data

We require:

- MSc or PhD in analytical/pharmaceutical chemistry, biochemistry, molecular biology or related biological field
- Experience in operating liquid chromatography (and mass spectrometer)
- Reliability, flexibility and ability to learn new skills
- Strong communication skills, ability of team collaboration
- Solid written and spoken English; proficiency with PC

We offer:

- Informal and friendly international environment of a top research institute. Young and inspiring teammates in laboratory equipped with modern technology
- Possibility of professional growth and further education
- Competitive salary and bonuses
- Five weeks of annual paid leave, three sick-days, and a wide range of benefits
- Full-time employment

You can start as soon as:

October/November 2024

Send:

Your motivation letter, CV and the names of up to three individuals who could provide reference letters (electronically to miluse.hradilova@img.cas.cz or marek.vrbacky@fgu.cas.cz) by October 06, 2024.
